Objective:

Predict the price of backpacks given various attributes.

Evaluation:

Root Mean Squared Error (RMSE)

Submissions are scored on the root mean squared error.

Dataset link:

Train file: training data link

Training data extra file: extra training data link

Test file: test file link

App created for you to check your RMSE against the actual answer.

https://for-dholu-rmse.streamlit.app/

Few points to consider:

- Unlimited submissions to streamlit app for testing your submission in allowed.
- Great hands-on project , would urge you to keep experimenting with different algorithms and things you studied.
- No time limit, keep this on. Keep experimenting.
- Rewards : more tests and good learning resources for you periodically.
- Punishment: Virtual sessions of .... You know it.
- This reward / punishment is irrespective of what we decide personally.
- Test has nothing to do with that at all.
